Table of contents

Use case 3.1.1: Logged as auditor, list and show positions. Also uses the integrated browser.	3
Use case 3.2.1: Logged as auditor and list the audits	6
Use case 3.2.2: Show audits.	10
Use case 3.2.3: Logged as auditor, create or edit an Audit	15
Use case 3.2.3: Logged as auditor, delete an Audit	19

Use case 3.1.1: Logged as auditor, list and show positions. Also uses the integrated browser.

Description

An user logged as an auditor must be able to list the assignable positions to audit. An auditor can only create an audit to positions that still don't have an audit created by him.

Preconditions

The shown views are based on the Populate Data.

Access

Log in to the system with an existing user.

Outcome									
Notes									

No additional tests are required for this use case since they are evaluated in depth in another section. You simply want to verify that the logged-in user continues to maintain access to this functionality.

Use case 3.2.1: Logged as auditor and list the audits

Description

A logged-in auditor can list all their audits, both those that are in the final state and those that are in draft status. However, any other user can only see the audits belonging to another auditor that are in the final state, discarding in this case those that are in draft status.

Access

First, the user must log as auditor in the login page. User: auditor, Password: auditor

The steps to follow are explained above.

Go to the section of the audit list.

> Header Menu > Display the "AUDITOR" options > List of audits

Then all the audits that have been created are displayed, grouped by final status and draft status.

List Audit

There are not positions availables to create an audit

Tests

Test 1																					
Description	As a logged-in user (auditor / auditor), the list of audits is displayed after following the previous steps.																				
Expected	All audits in this view must belong to the auditor. They should show themselves grouped by their state. In the case that it is in draft status, in addition to appearing the option to show should appear the option to delete and edit.																				
	Audits in the final state must make references to positions in the final state that have not been canceled.																				
	In our case, as there are no possible positions to be audited, the button to create a new audit cannot appear.																				
<div><h3>List Audit</h3><p>There are not positions availables to create an audit</p><p>List of final mode audits</p><div>7 items found, displaying 1 to 5. Test 4

Description

Non-logged-in users can see a list of audits grouped by auditor.

Expected

When a user does not log list an auditor audits should only appear those who are in final state. Likewise, only the set of these audits should appear in the final state, avoiding those buttons to create a new audit or division headings by type of audit status.

Deslogue and use /Acme-Rookies/audit/list.do?auditorId=75

	<p>List Audit</p> <p>7 items found, displaying 1 to 5. Test 6	
Description	The Back button must return to the home page, whether a user is logged in or not.
Expected	Whatever the previous action, the back button should return to the welcome page.
Outcome	
Notes	

Use case 3.2.2: Show audits.

Description

Both a logged-in user and a non-logged-in user have access to the sample view of an audit as long as this audit is in final mode, in the case of a draft mode only its creator can view it.

Access

First, the user must log as auditor in the login page. User: auditor, Password: auditor

The steps to follow are explained above.

Go to the section of the audit list.

> Header Menu > Display the "AUDITOR" options > List of audits

List Audit

According to the initial configuration assigned, 7 audits in final mode and 1 audit in draft mode must appear.

To see the information of an audit in final mode we must click on the magnifying glass of the first block, in case of wanting to see an audit in draft mode we will press in the magnifying glass of the second block.

Tests

Test 1	
Description	Insert valid data in the form, the user must provide a description text (for example "newDescription1"), select a draft mode and insert a score between 0.00 and 10.00. If all positions already have an associated audit, delete any audit in draft mode.
Expected	The user will be redirected to the show of this audit (/audit/show.do?auditId=XXXXX). The options for deleting and editing the audit must be available. The back button should redirect to the list of audits and this new audit should appear in the draft mode block.
Outcome	
Notes	

Test 2	
Description	The user must edit the previous audit by changing, for example, the position. It was indicated that it should be created in draft mode. If necessary because there are no available positions and all audits are in final mode, create a new user.
Expected	After being redirected to the show view the user can click on the edit button from the audit show or return to the list of audits, find his edited audit and click on the edit button. The position associated with the older audit should be available again.
Outcome	
Notes	

Test 3	
Description	The user tries to edit one of his audits in Final Mode by inserting it id in the URL (GET hacking)
Expected	If the logged-in actor is an auditor, he will be redirected to the list of his audits, otherwise he will be redirected to the welcome page.
Outcome	
Notes	

Test 4	
Description	The user provides a blank description.
Expected	The audit won't be updated and a message indicating that the description cannot be blank will be shown.
Outcome	
Notes	

Test 5	
Description	The user provides a null score.
Expected	The audit won't be updated and a message indicating that the score cannot be null will be shown.
Outcome	
Notes	

Test 6	
Description	The user provides a score that is out of range (bigger than 10 or smaller than 0).
Expected	The audit won't be updated and a message indicating that the score must be in the range between 0 and 10 will be shown.
Outcome	
Notes	

Test 7	
Description	The user modifies the html code of the page by modifying the value of the attributes (score-> String, status-> null ...)
Expected	A commit error message appears when saving, the html page must return to the previous values and if correct values are inserted, you must save.
Outcome	
Notes	

Test 8	
Description	The user modifies the html page and inserts in the id of the position one associated with another audit.
Expected	A commit error message appears when saving, the html page must return to the previous values and if correct values are inserted, you must save.
Outcome	
Notes	

Test 9	
Description	The user tries to edit one of the audit of another auditor user by inserting its id in the URL (GET hacking) <i>Create an auditor and a audit if it is necessary.</i>
Expected	<i>System redirects to the welcome page.</i>
Outcome	
Notes	

Use case 3.2.3: Logged as auditor, delete an Audit

Description

An user logged as Auditor must be able to edit his audits, which includes creating, editing and deleting them. An audit can be updated or deleted as long as it's saved in Draft Mode.

Access

First, the user must log as auditor in the login page. User: auditor, Password: auditor

The steps to follow are explained above.
