Tests

Test 1

Description

Click on the button to create a new curriculum and fill it with invalid data.

Expected

In the first place a form with six fields must appear, being the first 5 of completeness mandatory. After sending the form with erroneous fields, the error messages should appear right next to the field that they have completed in the wrong way and the curriculum should not be saved under any circumstances if an error is still present.

Outcome

Notes

Test 2

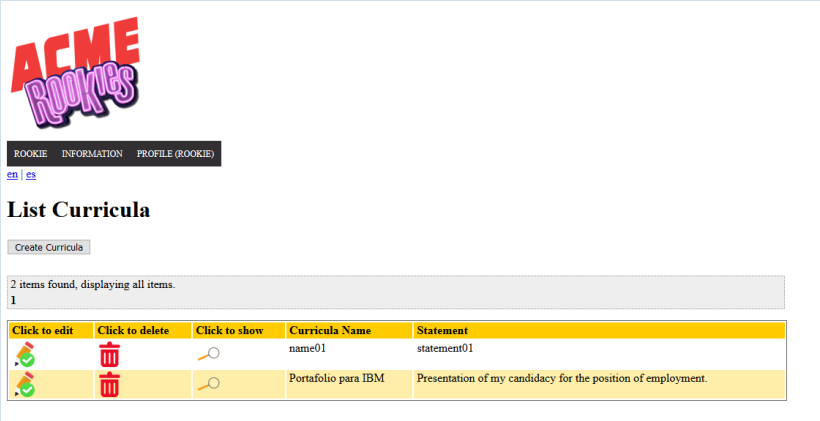

Description

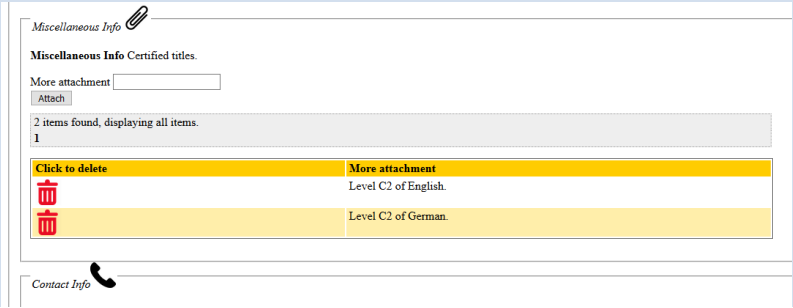

Re-complete the previous form but with valid data.

Expected

If all the fields have been completed correctly the system will save the completed curriculum and redirect to the displayed view of the saved curriculum. Make sure that all the fields are correct, see the change of the GitHub username by the link, the appearance of the buttons to edit and delete the created curricula, the buttons to create the position data and the educational data ...

Outcome	
Notes	

Test 3	
Description	Correct listing.
Expected	<p>Go back to the list of curricula and make sure that the new curriculum created now appears (press the back button).</p> 
Outcome	
Notes	

Test 4	
Description	Add additional data to the curriculum.
Expected	<p>Click on the magnifying glass and in the section to add additional information, attach new data. The page should reload and the data should be added to a one-to-one list. An icon to delete must appear next to them. Invalid data like a script should not be loaded.</p> 
Outcome	
Notes	

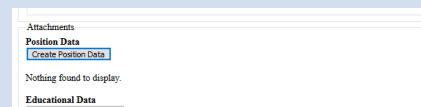

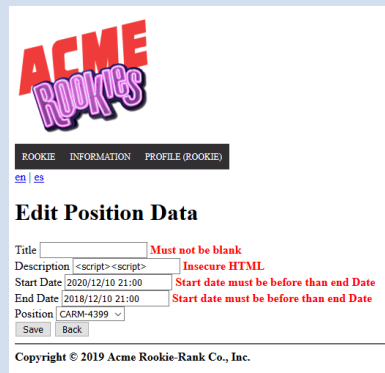

Test 5	
Description	Click on the button to create a new position and fill it with invalid data.

Expected

In the first place a form with five fields must appear, being four completeness mandatory.

After sending the form with erroneous fields, the error messages should appear right next to the field that they have completed in the wrong way and the position should not be saved under any circumstances if an error is still present.

Make sure that the available position is valid (position belonging to an accepted application).

Outcome

Notes

Test 6

Description

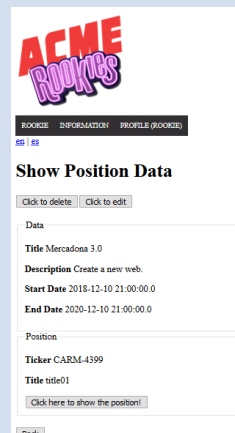

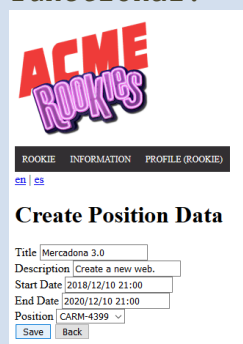

Re-complete the previous form but with valid data.

Expected

If all the fields have been completed correctly the system will save the completed position data and redirect to the displayed view of the saved position data.

Make sure that all the fields are correct, see the change of the GitHub username by the link, the appearance of the buttons to edit and delete the created curricula, the buttons to create the position data and the educational data ...

The editing and deletion buttons must be present and functional.

Outcome

Notes

Test 7	
Description	Check the creation and edited of educational data.
Expected	Repeat tests 5 and 6 for educational Data.
Outcome	
Notes	

Test 8	
Description	Try to do GET hacking to the system (I).
Expected	Copy the edit URLs, and try to edit being a logged-in user (not the entity's creator) or a non-logged-in user. You can use, as an example: /curricula/rookie/edit.do?curriculaId=67 /positionData/rookie/edit.do?positionDataId=XXXXX /educationalData/rookie/edit.do?educationalDataId=XXXXX Being XXXXX and 67 the ID of the entity to edit. The system must redirect to the start tab.
Outcome	
Notes	

Test 8	
Description	Try to do GET hacking to the system (II).
Expected	Copy the list and show URLs being a logged-in user (not the entity's creator) or a non-logged-in user. If you are not the creator of the entities or the owner of the list of curricula, no creation, editing or deletion button should appear. You can use, as an example: /curricula/show.do?curriculaId=67 /positionData/rookie/show.do?positionDataId=XXXXX /educationalData/rookie/show.do?educationalDataId=XXXXX Being XXXXX and 67 the ID of the entity to edit. The system must redirect to the start tab.
Outcome	
Notes	

Use case 17.1.2: Logged as rookie, delete the curricula and its components.

Description

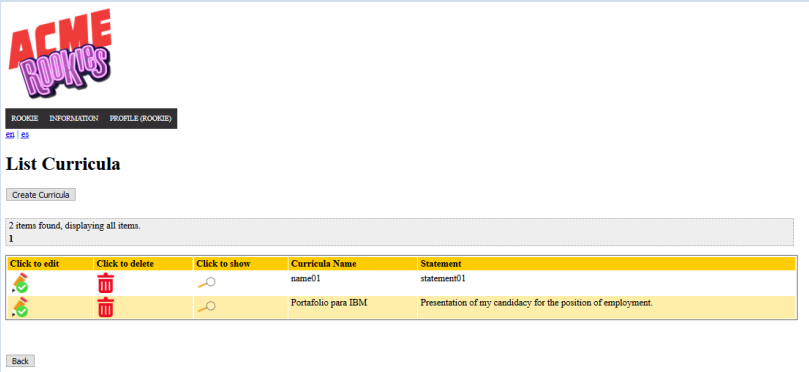

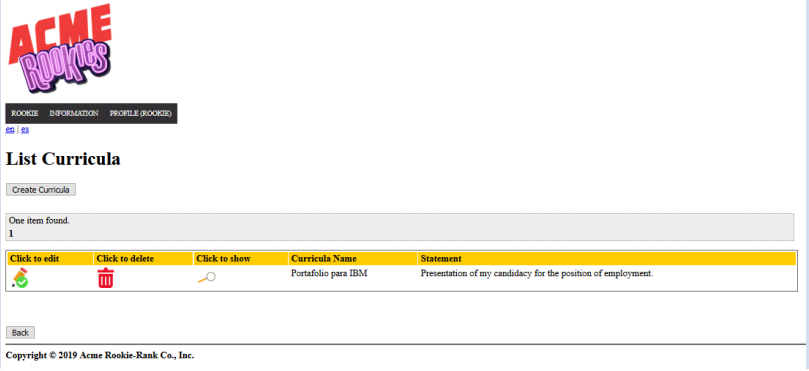

If the logged in user is the rookie creator of the curriculum he has the possibility of deleting the entire curriculum, or any of his attachments.

Access

First, the user must log as auditor in the login page. User: rookie, Password: rookie

Then follow the steps described above to get to the list of curricula.

Tests

Test 1	
Description	Delete a curricula
Expected	In the curricula list click on the red trash can icon, the selected curriculum should disappear from the list and from the system.
Outcome	
Notes	

Test 2	
Description	Check the delete of educational data and position data.
Expected	Entities must disappear from their listings and from the system.
Outcome	
Notes	

Test 3	
Description	Try to do GET hacking to the system.
Expected	Copy the delete URLs, and try to delete being a logged-in user (not the entity's creator) or a non-logged-in user. You can use, as an example: /curricula/rookie/edit.do?deleteId=67 /positionData/rookie/delete.do?positionDataId=XXXXXX

	<code>/educationalData/rookie/delete.do?educationalDataId=XXXXX</code> Being XXXXX and 67 the ID of the entity to edit. The system must redirect to the start tab.
Outcome
