## Table of contents

Use case 23.2.1: Logged , send a message	3
Use case 23.1.2: Logged, delete the message	10

## Use case 23.2.1: Logged , send a message

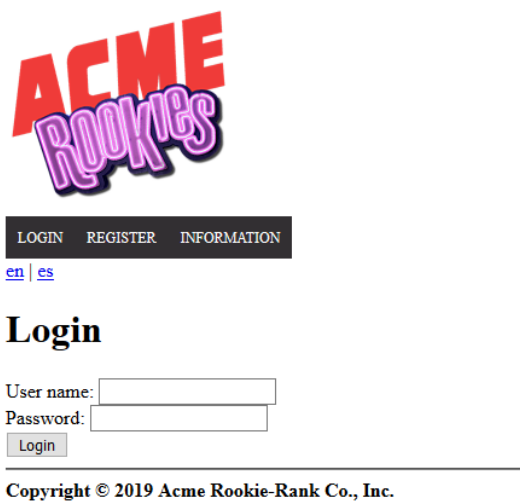

### Description

An user logged must be able to manage his message, which includes creating, listing, and deleting them.

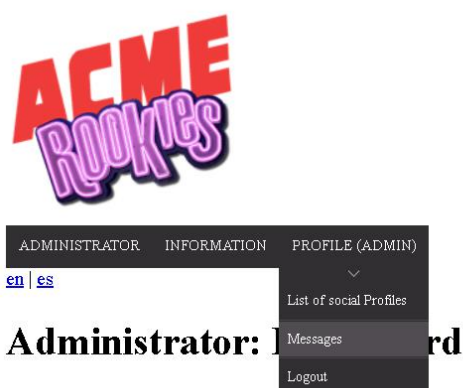

### Access

First, the user must log in the login page. User: admin, Password: admin

The steps to follow are explained down.

Go to the section of user profile.

> Header Menu > Display the "PROFILE" options > Messages

The list of sended messages and received messages should appear. The lists are empty because there aren't messages in the populate.

## Tests

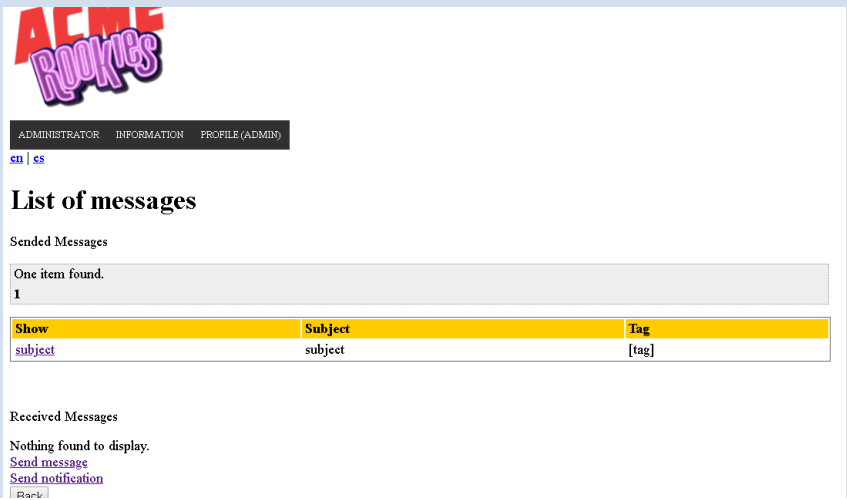

Test 1	
Description	Click on the button to create a new message and fill it with invalid data.
Expected	<p>A form with four fields must appear, being 3 completeness mandatory.</p> <p>After sending the form with erroneous fields, the error messages should appear right next to the field that they have completed in the wrong way and the message should not be saved under any circumstances if an error is still present.</p>
Outcome	
Notes	

Test 2	
Description	Re-complete the previous form but with valid data.
Expected	<p>If all the fields have been completed correctly the system will send the message and redirect to the list view of the messages.</p> <p>Make sure that all the fields are correct.</p>

Outcome	
Notes	

Test 3	
Description	Correct listing.
Expected	<p>Check that the list of message is correct and make sure that the new message created now appears</p>  <p>The screenshot shows the ACME Rookies Admin interface. At the top is the ACME Rookies logo. Below it is a navigation bar with links: ADMINISTRATOR, INFORMATION, and PROFILE (ADMIN). There are also links for en and es. The main heading is 'List of messages'. Under 'Sended Messages', it says 'One item found. 1'. Below this is a table with columns 'Show', 'Subject', and 'Tag'. The table contains one row with 'subject' in the Subject column and '[tag]' in the Tag column. Under 'Received Messages', it says 'Nothing found to display.' and provides links for 'Send message' and 'Send notification'. At the bottom left is a 'Back' link.</p>
Outcome	
Notes	

Test 4	
Description	Add a new message to the list.
Expected	When adding a new message with a tag with order previous to the previous message, we see that the list is reordered according to the tag

<b>Outcome</b>	
<b>Notes</b>	

Test 6	
<b>Description</b>	Try to do GET hacking to the system (I).
<b>Expected</b>	<p>Copy the edit URLs, and try to enter to the show of a message. Try it without login and with an actor who is neither the one who sends it nor the one who receives it. In this case the recipient is the actor with credentials -&gt; user:provider password:provider, for this actor the test not make sense.</p>  <p>Depending on the populate the id of the message may vary so to make sure you have that id you would have to enter the show of that message before and see its url  You can use, as an example:  /message/show.do?messageId=32770  Being 32770 the ID of the entity to edit.  The system must redirect to the start tab or to the log in view in the case of a not login</p>
<b>Outcome</b>	

## Use case 23.1.2: Logged, delete the message

### *Description*

If a message is deleted and it doesn't have tag "DELETED" then it gets tag "DELETED", but it's not actually deleted from the system; if a message with tag "DELETED" is deleted, then it's actually removed from the system

### *Access*

First, the user must log in the login page. User: admin, Password: admin

Then follow the steps described above to get to the list of message.

Tests

Test 1

Description

Expected

Delete a message

In the message list click on the subject of message, the selected message should set her tag to “DELETED” in case yours is distant.

Notes

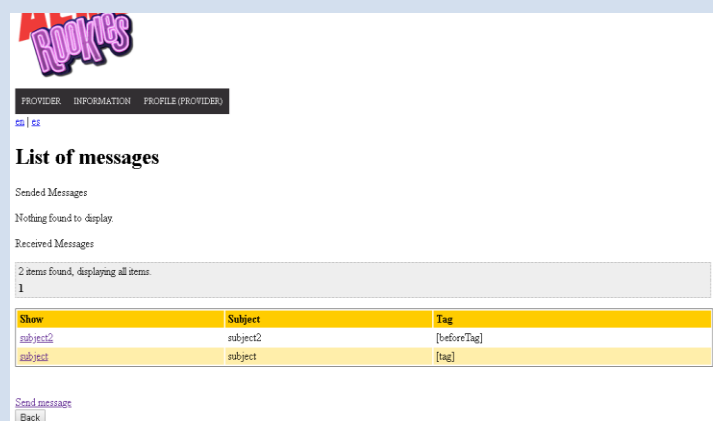

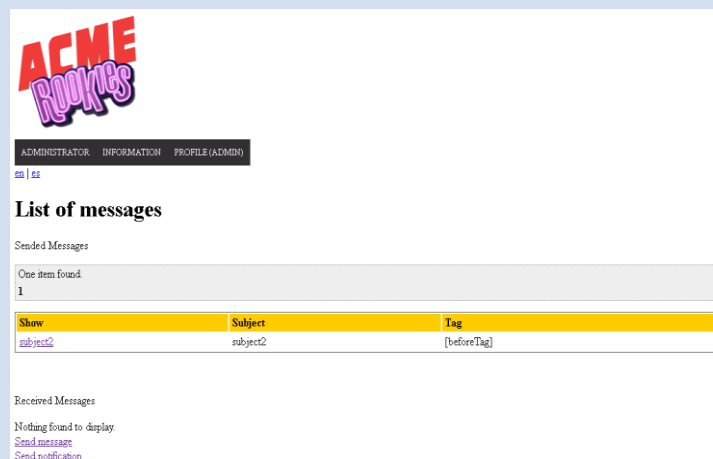

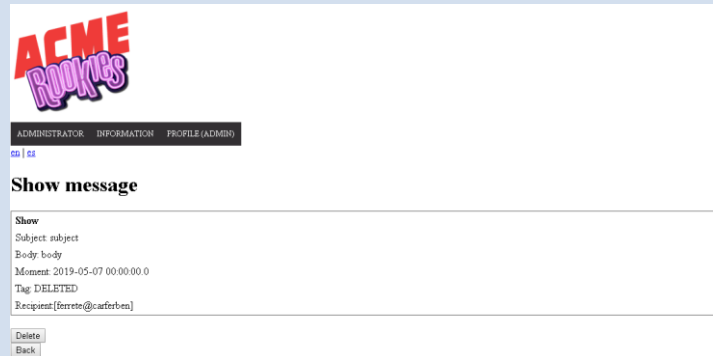

## Test 2

Description

The same test but with the tag deleted

Expected

In this case the message should be delete of her list but not of the system because the recipient haven't deleted it.

The recipient(actor user:provider password:provider) have the message with the send tag.

Outcome

Notes

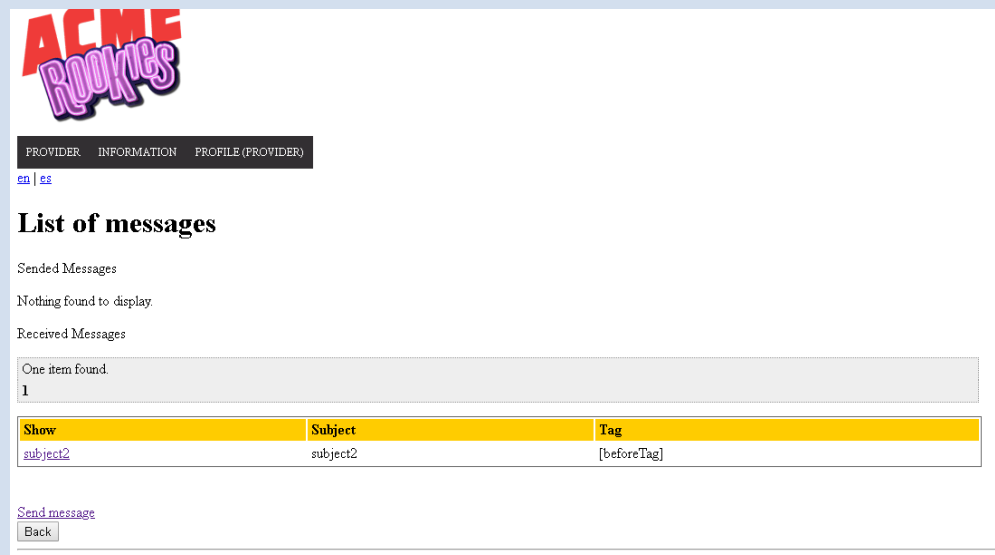

### Test 3

#### Description

Repeat the test 1 and 2 with the provider

#### Expected

Here we are going to check that in the case that one actor remove a message and no one apart from he have the message, the message will be remove from the system.

The message have been remove.

Result Grid

•	NULL	NULL	NULL	NULL	NULL	NULL

#### Outcome

#### Notes

### Test 4

#### Description

Delete a message hacking

#### Expected

We are going to check than an actor that not contains the message or arent logged can't remove the message

Try this:

message/delete.do?id=65538

with an actor that won't be the actor(admin/admin) or the actor(provider/provider).

The system should redirect to the start tab
